

Lexus Design Award Launches

November 27, 2012

TORRANCE, Calif., Nov. 27, 2012 – The Lexus International Division of Toyota Motor Corporation announces the launch of the Lexus Design Award, an international design competition targeting designers around the world.

The Lexus Design Award is aimed to provide an opportunity for the next generation of designers to work with a world-famous designer as a mentor to create prototypes of their designs. Through this initiative, Lexus hopes to contribute to nurturing and supporting creativity.

The theme of the Lexus Design Award 2012 is *motion*—a word and concept directly connected to people’s everyday lives. Under this award program, Lexus welcomes innovative design and calls for works that display a deep understanding of Lexus’ design philosophy, uniquely interpret concepts and provide original perspectives on and solutions to various issues of daily life. Lexus welcomes entries from designers in fields such as architecture, product design and fashion.

The application period runs through Dec. 31, 2012. The winners are to be announced and their works exhibited during Milan Design Week in April 2013.

About the Lexus Brand

With the vision of Progressive Luxury, Lexus has been pursuing and presenting values different from those of conventional luxury makes. Lexus has been striving not only to create a more luxurious experience through automobiles, but also, through such technological advancements as the Lexus Hybrid Drive, to contribute to efforts to solve numerous issues that have surfaced in the modern world.

Lexus believes that *design* for this competition goes beyond mastery of form and is a process in problem solving and an effort to propose solutions to shape a better society and future. Lexus therefore welcomes applications that propose a wide variety of innovative designs to overcome challenges in fields such as architecture, product design and fashion.
