

2020 Lexus GS 350: A Sedan with both Luxury, Sporty Handling

November 19, 2019

Image not found or type unknown

PLANO, Texas (November 19, 2019) – In the GS 350, a muscular 3.5-liter V6 produces 311 hp and 280 lb.-ft. of torque and is paired with an eight-speed automatic for RWD, while the AWD variant features a six-speed. The V6's combination of direct fuel injection and sequential port fuel injectors ensures ample power and crisp responsiveness.

The 2020 Lexus GS 350 offers select safety features and conveniences as standard, such as the Lexus Safety System+ that includes Pre-Collision System (PCS) with Pedestrian Detection, Lane Departure Alert (LDA) with Lane Keep Assist, Intelligent High Beam (IHB) and All-Speed Dynamic Radar Cruise Control. The 2020 GS models also include as standard Blind Spot Monitor (BSM) with Rear Cross Traffic Alert (RCTA), which helps detect vehicles in side blind spots and alert the driver to rear cross traffic when backing out of a parking space.

Striking Signature Style

The Lexus GS features a variation of the Lexus signature spindle grille, framed by satin chrome trim and flanked by distinctive standard Bi-LED headlights. The nighttime glow is unmistakably the look of Lexus.

The bold exterior design is available in a variety of colors. All the Mica color options, including Matador Red Mica, Nightfall Mica, Ultrasonic Blue Mica 2.0 and Smoky Granite Mica, use an extraordinarily complex multi-layered, twice-baked process commonly used only for concept vehicles or custom cars.

All-Weather Compatible

For added grip in a variety of conditions, the Lexus GS 350 offers an available all-wheel drive (AWD) system featuring an electronically controlled center differential which provides a normal 30:70 torque split, with the rear-wheel bias favoring handling agility. The system reacts instantaneously to alter the split to as much as 50:50, depending on driving conditions, to help optimize traction.

For added grins when driving, the F SPORT package available for all GS models combines track-tuned chassis enhancements with exclusive exterior and interior design features. The

GS 350 F SPORT can be combined with all-wheel drive. With rear-wheel drive, the F SPORT offers a limited-slip differential and opens the door to higher handling performance with the available Lexus Dynamic Handling (LDH) system with Dynamic Rear Steering (DRS).

Modern Luxury, Rendered Classically

A design that mixes both modern and classic luxury elements, the GS cabin provides a comfortable feel to satisfy a multitude of drivers and passengers. The classic ambience is exemplified by interior trim selections that include Open-Pore Brown Walnut, Gray Sapele Wood with Aluminum, Striated Black and Naguri Aluminum. Interior and leather colors include Chateau and Flaxen and Black, while the F SPORT offers Black, Rioja Red and Flaxen.

The analog clock located in the center of the dash is housed in a single ingot of aluminum, features LED indicators and uses GPS for adjusting the time zone.

The interior design sets the stage for pure Lexus luxury, with a long list of standard amenities. Inside the GS you'll find 10-way power front seats, power tilt-and-telescoping steering column with automatic tilt-away, Siri® Eyes Free Mode and a Lexus 12-speaker, 5.1 surround sound system.

Lexus Safety System+

The 2020 Lexus GS has the most advanced active safety equipment ever offered on the GS. Its structure and 10 standard airbags help provide occupant protection, while a wide array of driver-assist technologies helps the driver avoid hazards.

Lexus Safety System+ remains standard for 2020, combining Pre-Collision System (PCS) with Pedestrian Detection, Lane Departure Alert (LDA) with Lane Keep Assist, Intelligent High Beams (IHB) and All-Speed

Dynamic Radar Cruise Control.

All-Speed Dynamic Radar Cruise Control tracks the speed of the vehicle traveling ahead and can adjust the speed setting accordingly to help maintain a preset distance. Using a combination of millimeter-wave radar and a front-facing camera, PCS can help detect vehicles – and in some circumstances, pedestrians. The system can warn the driver of a possible collision and can initiate automatic braking with Brake Assist, if necessary.

Using a camera to detect visible lane markings, Lane Departure Alert is designed to convey audio-visual alerts and vibrate the steering wheel if the system determines that the driver unintentionally deviated from the lane. Lane Departure Alert, with Lane Keep Assist enabled, can help the vehicle stay in the center of its lane by smoothly increasing steering torque a small amount to assist in maintaining course.

Intelligent High Beam combines technology, safety and driving courtesy. It automatically adjusts high- and low-beam illumination by sensing not only oncoming traffic, but also the taillights of the vehicle traveling in front.

Modern Multimedia

The Lexus GS embodies the brand's mastery of multimedia that's both powerful and user-friendly. The available 12.3-inch screen offers full-screen map capability – which is standard on GS 350.

Side “enter” buttons on the Remote Touch Interface controller and a shortcut menu on the side of the screen make it even easier to operate climate control, audio, phone, navigation and more. Apple iPhone® users have yet another control option, Siri® Eyes Free Mode. Make calls, select songs from iTunes®, get turn-by-turn navigation through Apple Maps and much more – all by asking Siri.

Lexus Enform for Safety, Convenience and Fun

Lexus Enform Safety Connect's is complimentary for the first 10 years of ownership for the 2020 Lexus GS 350, with access to Lexus Enform response centers 24/7/365. With Lexus Enform Service Connect, the vehicle can also send alerts for specific factory recommended maintenance, simultaneously alerting a preferred Lexus retailer. Use the Lexus mobile app (for iOS devices) or [LexusDrivers.com](https://www.lexusdrivers.com) website to set push-reminders and alerts for maintenance and service issues.

With Lexus Enform Remote, now included for the first year of ownership, the customer can remotely view and control certain aspects of the GS using a mobile app for iOS and Android devices. Functions include remote door lock/unlock; remote start/stop for the engine and climate control; vehicle finder, guest driver monitor and more. Navigation is accompanied by the Lexus Enform Destination

Assist and subscription-free Lexus Enform App Suite 2.0. Its voice-enabled apps let you search the Internet through Destination Search, listen to Internet radio, with iHeartRadio and search business reviews on Yelp®.
