

6 Ways Driving a Lexus Hybrid is Like Falling in Love

February 12, 2021

The moment you fall in love, the world comes to a stop. But when you fall in love with one of the sleek, stylish 2021 Lexus hybrids, things begin to speed up. That breathtaking acceleration, those sophisticated lines, plus the features and tech your heart has been dreaming of, they're all here in a package to send your pulse racing. In time for Valentine's Day, check out a new generation of Lexus hybrids and feel the love.

The One for You

It's said there's someone for everyone. It can now also be said, for every driver, there's a hybrid. From the 2021 ES 300h and UX 250h, and hybrid models of the LC, LS, NX and RX, the key to finding "the one" is to be yourself, live your life to the fullest, and trust your gut—and heart.

Room for More

One good sign that you've met your perfect match is finding lots of room in this magical new person's life for you. They're eager to meet and embrace your world: your friends, family, kids, pets, and all the unique things you do. Lexus' 2021 hybrid lineup feels the same way. Introduce us, it says. Let's go skiing with your crew in an RX 450h or take me surfing in an NX 300h. Show me around and show me off to your universe in a sedan. I've got room for your dog, your weekender bags, your suits, your snowboard and your big personality. Nothing about you is too much for a big heart, so don't hesitate to bring your stuff when you step into the space in their life that's been waiting for a you-shaped, you-sized partner for adventure.

The Pulse Quickens

Excitement, exhilaration and a thrill that comes in a flash: there's no mistaking the moment you fall in love. It happens fast, and suddenly, everything seems to rev up. The same heart-racing emotion is part of the hybrid driving experience as an ardor for acceleration moves the relationship forward. For example, with an ability to do 0-60 mph in a projected 5.1 seconds, the LS 500h (RWD) packs a 354-combined-system-horsepower.

Love at First Sight

[According to science](#), love at first sight is possible. And what has this got to do with hybrids? Let us count the ways: RX 450h in Moonbeam Beige Metallic with NuLuxe®-trimmed seats in Glazed Caramel. An ES 300h in Sunlit Green; LC 500h available in Infrared; NX 300h in Nori Green Pearl; UX 250h available in Cadmium Orange. You know it in a flash: that is one handsome roofline; that is one beautiful grille.

Beautiful on the Inside

Even on a first date, you know this is someone very special. A couple more dates, you get to know each other better, and you are smitten. Small ways in which they show their character reveal the beauty on the inside. Lexus hybrids reveal their thoughtful soul through interior touches such as the 2021 ES 300h's natural steering wheel angle, revised pedal positions and standard 10-way power adjustable front seats. With an emphasis on comfort, a focus on safety, audio to suit the mood (thanks, Apple CarPlay® and Android Auto™ compatibility) and finishes that feel like holding your beloved's hand, well, you soon find you don't want to leave—ever.

Built to Go the Distance

Looks and personality may be the keys that start the engine of love, but staying power is what turns going on a date into *setting* a date. True love may begin with a glance, but it proves its mettle by being there for you no matter what, and that means it can go the distance. Together, you *are* combined, highway and city MPG EPA estimates. The LC 500h is considered the first-ever Lexus Multistage Hybrid, with a system that teams the gasoline engine with two electric motor/generators. Now that's what we call "a match made in heaven." Suddenly, it's easy to see the future, and to imagine taking the twists and turns of life together. Something they also say about finding the right one, "When you know, you know."
