As the iconic sedan that has set the tone for all other luxury automakers, the Lexus LS is positioned by Brand Holder and Master Driver Akio Toyoda as, “a model that gives rise to transformation through the spirit of constant innovation and by providing new technologies and value for the times.” For 2022, the flagship Lexus

LS 500 continues this trend with additional in-cabin refinement and the addition of standard Lexus Safety System+ 2.5 on all models.
