

2022 Lexus LC Convertible

October 29, 2021

The LC 500 Convertible joined the Lexus lineup in 2020, bringing an innovative soft-top design to the flagship sports coupe. The LC 500 Convertible returns for 2021 with enhancements to the vehicle's dynamic handling characteristics based on the Lexus Driving Signature philosophy. Front and rear suspension settings have been optimized to enhance ground contact feel, linear steering response and steering effectiveness in the high cornering G range. This suspension enhancement results in nimbler vehicle handling and a sharper connection between driver and vehicle.
