PLANO, Texas (Feb. 14, 2022) – Lexus has released a gallery of new pictures and animations of its possible next-generation BEV Sport, Sedan and SUV concepts. The models were first revealed on December 14, 2021, in the [corporate battery electric vehicle \(BEV\) announcement](#) made by Akio Toyoda, Toyota Motor Corporation President and Lexus Brand Holder. The new Sedan, Sport and SUV concepts are proposed to be part of a full line-up of BEVs Lexus recently unveiled under the collective vision known as “[Lexus Electrified](#).”

With the bold proportions and low ride height required for a high-performance sports car, the Lexus BEV Sport concept symbolizes the future of the luxury brand while also reviving the spirit of the iconic Lexus LFA. Acceleration from 0-60 mph could be in the low two-second range and the cruising distance could exceed 430 miles, thanks to the possible use of solid-state batteries.
