TOKYO (Oct. 25, 2023) — At the inaugural Japan Mobility Show 2023, Lexus introduced a range of concept models under the theme “Pushing the Boundaries of the Electrified Experience”, envisioning new possibilities for mobility through electric cars. The Lexus booth hosted the global debut of the next-generation Battery Electric Vehicle (BEV) concept car LF-ZC, set for release in 2026, along with the BEV flagship concept model LF-ZL, which offers a glimpse into the brand’s future.
