

2024 LEXUS RZ

December 19, 2023

Image not found or type unknown

After ushering in a new era of Lexus Electrified in January 2023 as the first all-electric vehicle in the brand's lineup, the Lexus RZ sees several updates in 2024, including an all-new option – the RZ 300e with FWD. The RZ 300e has a higher manufacturer-estimated range rating of up to 266 miles, allowing customers more

flexibility during their daily commute. Also new in 2024, Copper Crest is added as an available exterior color option in mono- and bi-tone while a dual-voltage charging cable for 120V and 240 outlets becomes standard on all models.
