

Toyota Recalls Certain Model Year 2022-2023 Toyota Tundra and Lexus LX Vehicles

May 30, 2024

PLANO, Texas (May 30, 2024)—Toyota is conducting a safety recall involving certain model year 2022–2023 Toyota Tundra and Lexus LX (conventional gas model only) vehicles in North America. Approximately, 102,000 Toyota and Lexus branded vehicles are involved in this recall in the U.S.

There is a possibility that certain machining debris may not have been cleared from the engine when it was produced. In the involved vehicles, this can lead to potential engine knocking, engine rough running, engine no start and/or a loss of motive power. A loss of motive power while driving at higher speeds can increase the risk of a crash.

Toyota is currently developing the remedy for this issue.

Owners of involved vehicles will be notified by late July 2024.

Information about automotive recalls, including but not limited to the list of involved vehicles, is current as of today's filing date and is subject to change thereafter. To see if your vehicle is involved in a safety recall visit [Toyota.com/recall](https://toyota.com/recall) or nhtsa.gov/recalls and enter your Vehicle Identification Number (VIN) or license plate information.

For any additional questions, Lexus customer support is also available by calling the Lexus Brand Engagement Center (1-800-225-3987) for Lexus vehicles.
