

2026 LEXUS UX HYBRID

November 14, 2025

Image not found or type unknown

The Lexus UX 300h, a versatile compact crossover, enters 2026 with the same powerful hybrid powertrain options and other updates added for 2025, along with a few minor color and trim changes. New last year, the hybrid system boasts 196 total system horsepower on both front- and all-wheel-drive versions. The new-last-year

transaxle and lightweight lithium-ion battery contribute to the UX's higher output and more responsive performance.
