

2027 Lexus ES Electric

August 10, 2026

Image not found or type unknown

The ES has been a fixture in the Lexus lineup since being launched alongside the flagship LS in 1989. Fully redesigned for 2026 and offering for the first time battery electric models (ES 350e and ES 500e), as well as a hybrid powertrain (ES 350h), the ES enters 2027 unchanged.
