For 2027, the Lexus LX receives a thoughtful range of enhancements that elevate both its bold styling and everyday functionality. On the Premium grade, new darker finish 20-inch wheels add an even more commanding presence, while the F SPORT Handling grade amplifies its athletic character with standard red front and rear

brake calipers. Inside, the LX continues to expand its premium appeal with the addition of the Palomino interior color option on the F SPORT Handling grade, bringing a warm refined contrast to its sporty design.
