Five Things to Know About the 2027 Lexus NX

November 20, 2026

Image not found or type unknown

In its most daring expression of a compact luxury SUV, the Lexus NX is newly redesigned and greatly enhanced for the 2027 model year. From driving dynamics to available personalized cabin experiences, the 2027 Lexus NX continues to deliver for its customers.

Ready to learn more about what makes the 2027 Lexus NX stand out? Check out these five highlights.

100% Electrified NX Lineup

The 2027 Lexus NX lineup is all-electrified, giving guests a choice of Hybrid Electric Vehicle (HEV) or Plug-In Hybrid Electric Vehicle (PHEV) powertrains.

The NX is planned to include four grades: Premium, Premium+, F SPORT, and Luxury. With the HEV powertrain, Premium and Premium+ grades are available with the choice of either all-wheel drive or front-wheel drive, while F SPORT and Luxury grades will exclusively be offered in all-wheel drive. The PHEV powertrain is available on all NX 450h+ grades and is paired exclusively with all-wheel drive.

Final EPA-estimated fuel economy figures are expected to be disclosed closer to the 2027 NX's on-sale date. The full manufacturer-estimated MPG ratings for the NX 350h and NX 450h+ can be found here.

Sharper Look Inside and Out

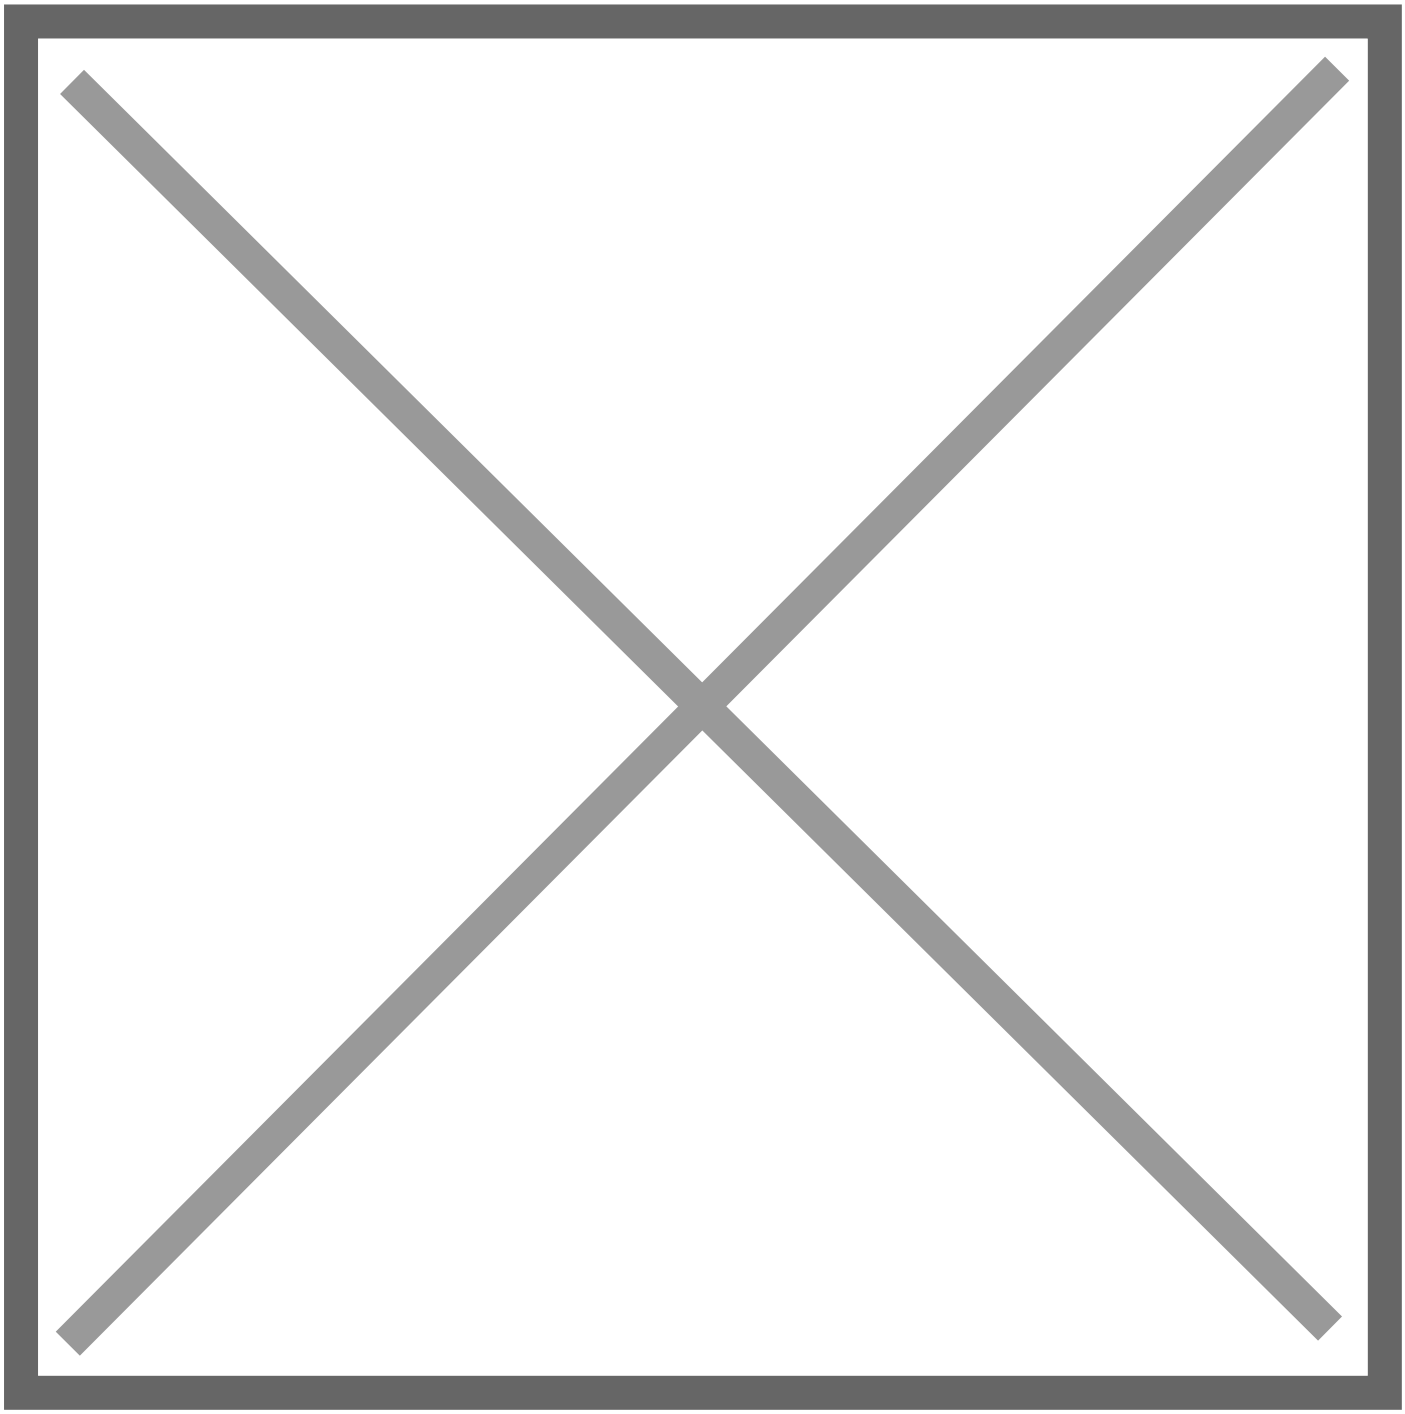

Styling updates to the NX's front end and taillights create the look of a lower, wider stance. A wide new grille and LED-accented headlamps make a bold impression. What's more, the headlamps integrate the turn signals and daytime running lights into a distinctive dual-line lighting signature that gives the NX a sharp, unmistakable

look while balancing design with functionality.

In addition, the new F SPORT trim takes the sporty look even further with dark-finished wheels, dark trim and an F SPORT steering wheel.

Refined In-Cabin Technology

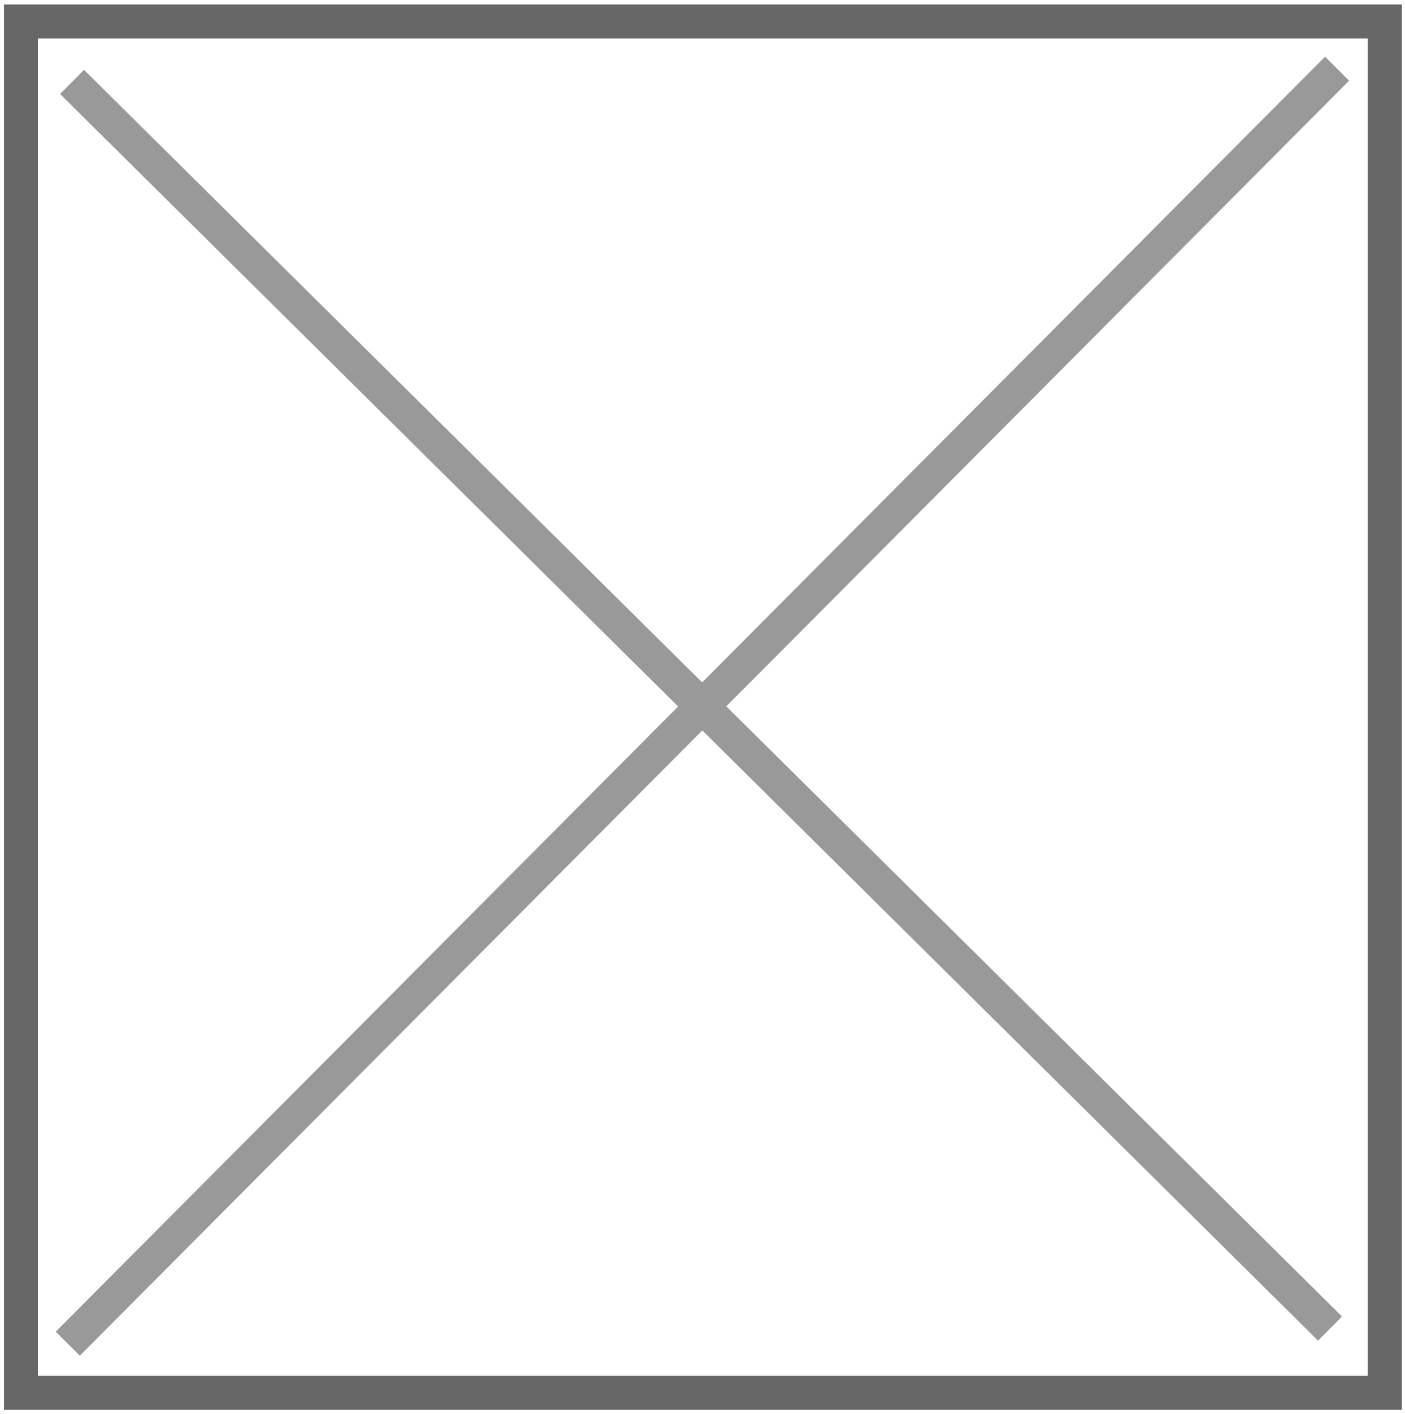

Guests who take the driver’s seat of the 2027 Lexus NX will find a new 12.3-inch driver Multi-Information Display (MID) alongside a 14-inch central touchscreen running the latest Lexus Interface multimedia system,

both which are now standard on all grades.

The system’s highlights include enhanced Voice Assistance, native map functionality integrated directly into the MID and standard wireless Apple CarPlay® and Android Auto™ compatibility.

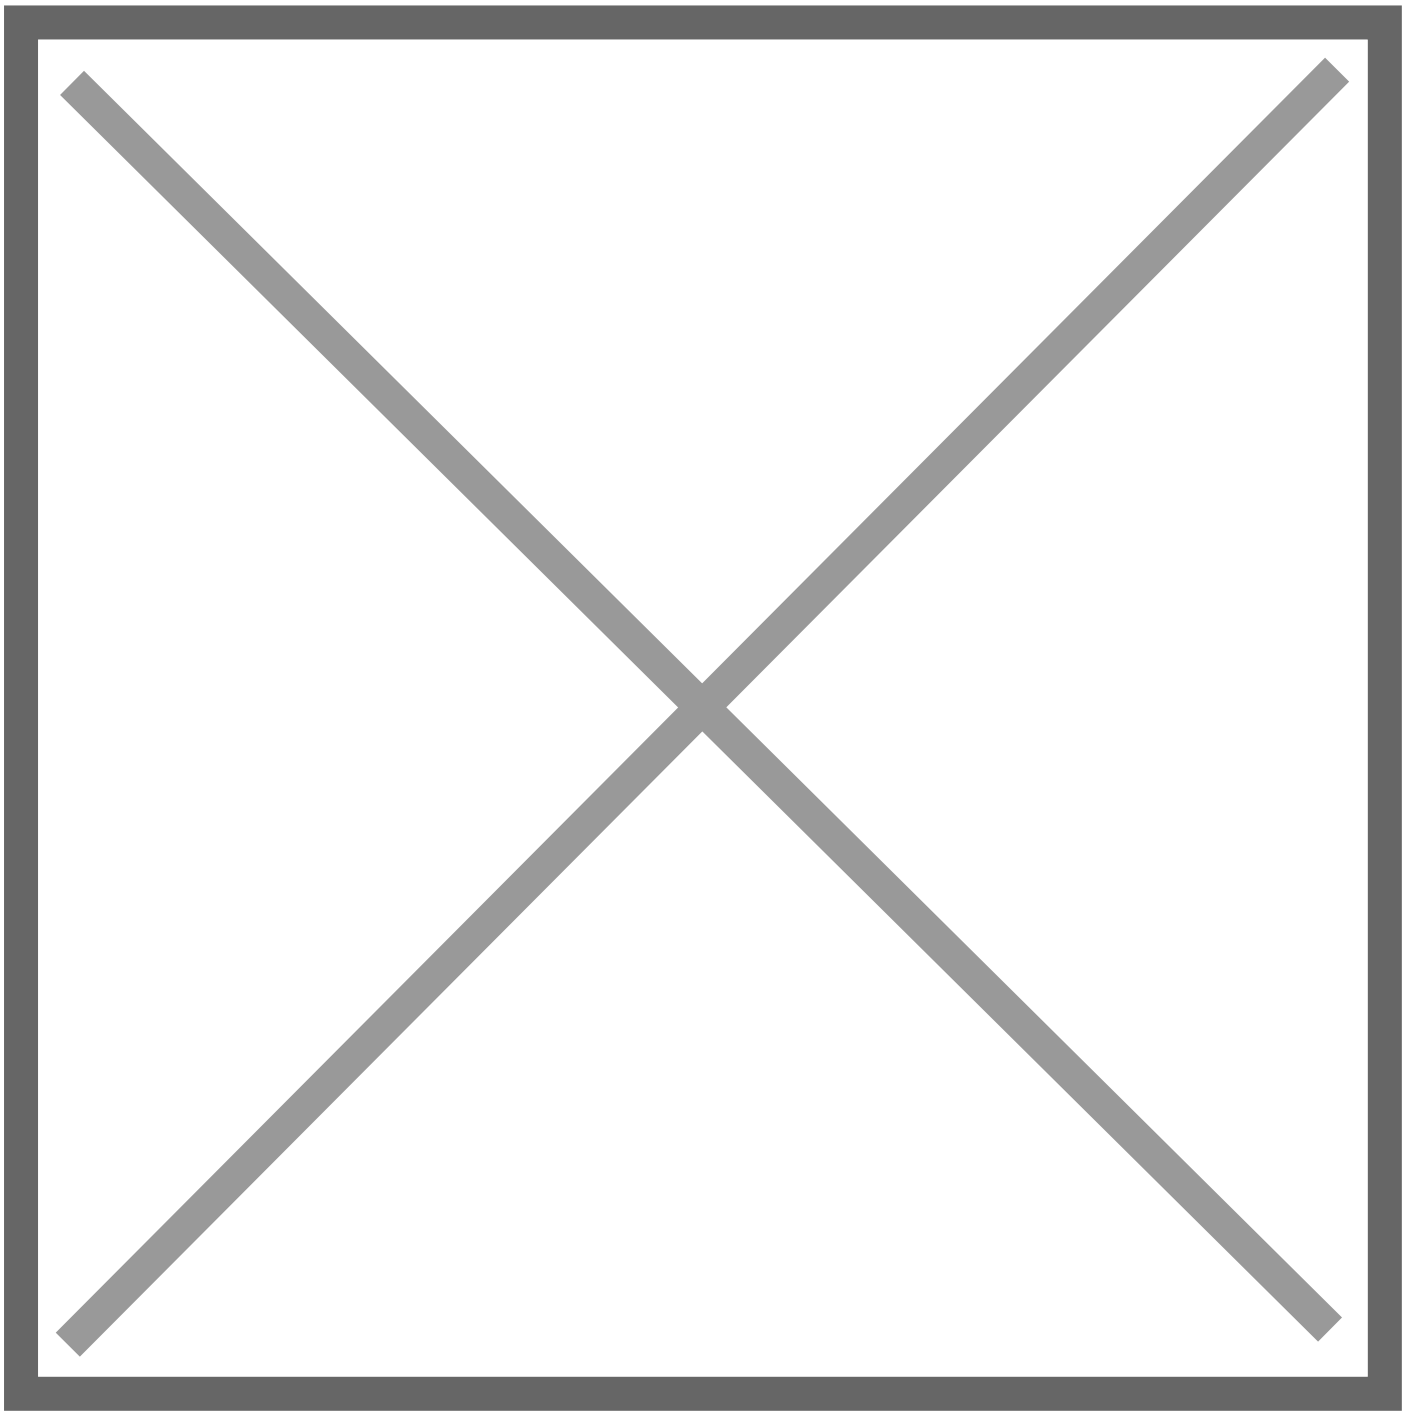

Upgraded Safety Features

Every 2027 Lexus NX comes standard with Lexus Safety Sense+ 4.0 (LSS+ 4.0), the brand’s latest suite of active safety and convenience features. An upgrade over the previous-generation NX’s LSS+ suite, LSS+ 4.0

offers enhanced detection capabilities, broader situational awareness, and expanded driver-assistance technologies to help provide greater confidence and peace of mind behind the wheel.

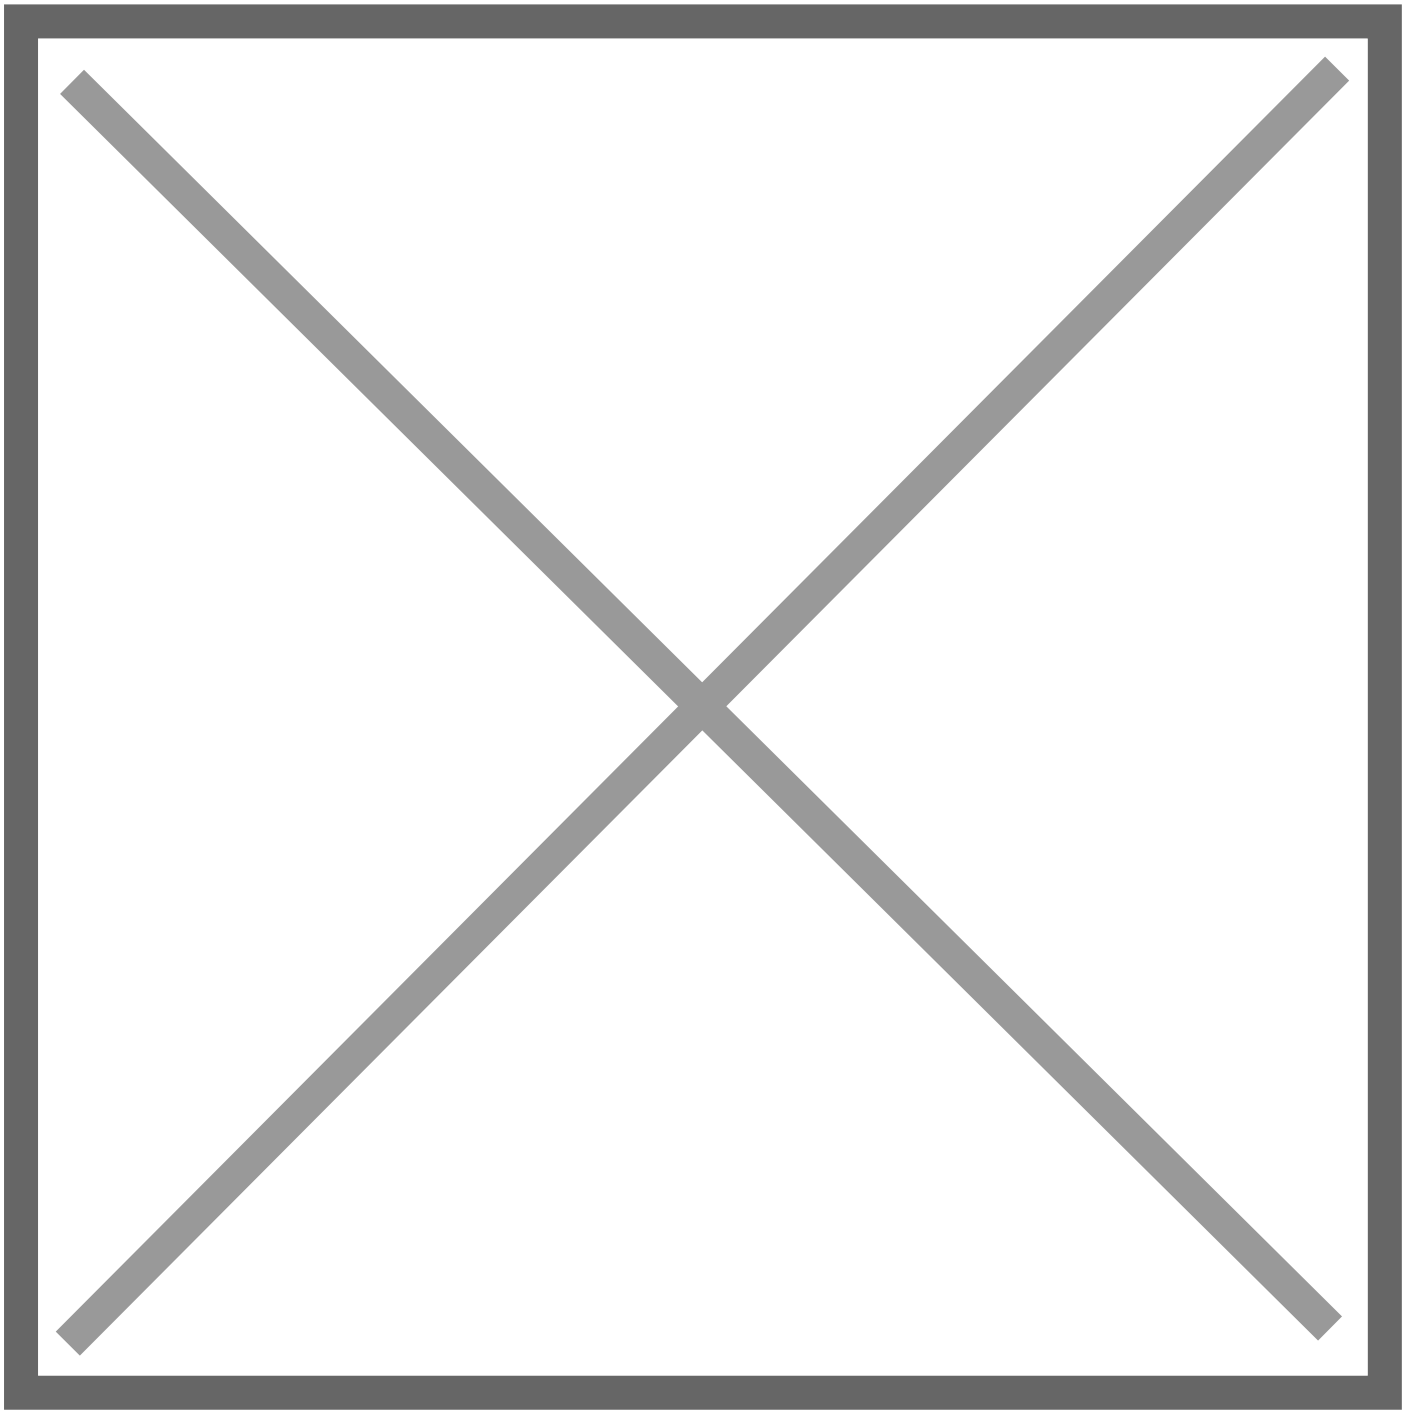

A Feast for the Senses

The all-new Sensory Concierge feature tailors the cabin's sights, sounds and even scents to the driver's whims. Standard on NX Luxury and F SPORT grades, it coordinates illumination, music, climate control, seat temperature and fragrance across three modes:

- **INSPIRE**: Energizes and uplifts with coordinated illumination, engaging audio, refreshing cabin airflow and tailored comfort settings.
- **RADIANCE**: Promotes focus and clarity with lighting, fragrance, sound and comfort settings designed to create a more engaged and comfortable daily experience.
- **REVITALIZE**: Encourages relaxation and renewal with calming ambient sounds, soothing illumination and comfort-focused settings.

In addition to the three Sensory Concierge modes, each fragrance can be selected independently, allowing even further personalization in the cabin: **Shinmei**, a citrusy fragrance inspired by dawn's sense of new beginnings; **Seiyo**, a gentle white floral scent inspired by abundant spring sunlight; and **Hanya**, a soft, mysterious musk evocative of the quiet stillness of night.

Additional grade details and pricing info for the 2027 Lexus NX will be available closer to the on-sale date. Until then, what’s known so far about the new NX appears to provide guests with a lot to look forward to with this compact luxury SUV.
